## Comprehensive Reconciliation, Settlement & Dispute Management Systems

StarRECON is a web based **PCI-DSS** compliance comprehensive **4 ways** Reconciliation, Settlement & Dispute Management System for retail banking transactions, which has paved the way to mirror bank transactions from the Bank's Switch/Host/ATM-EJ/Interchange/Tie-up Banks, for managing net payments & receipts.

**CGS'** comprehensive multi-level reconciliation services efficiently manage reconciliation for all types of electronic payment transactions. Our services reduce time and cost in overcoming challenges in reconciliation and settlement with multiple network connections.

**CGS'** proven skills and expertise that have successfully delivered innovative, customized, **cost – effective solutions** for the retail banking segment.

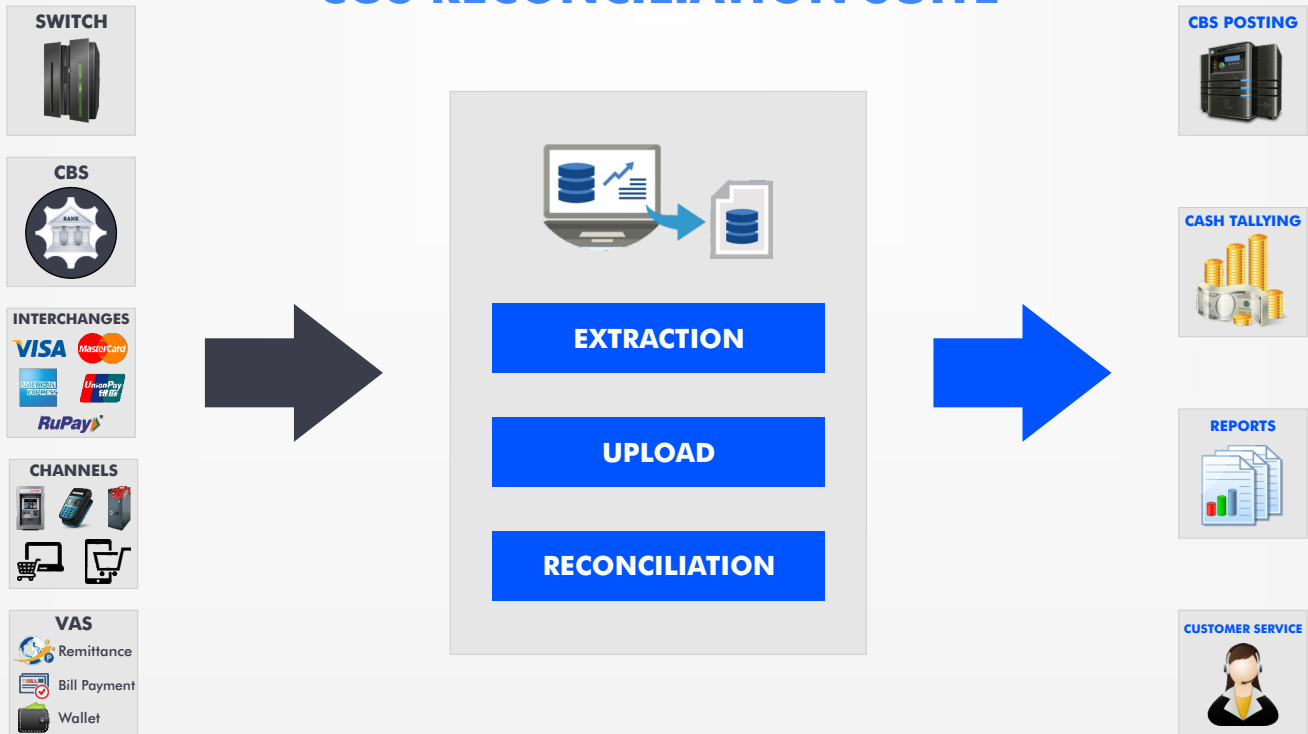

## TECHNICAL BENEFITS

- **End to End reconciliation solution** such as ATM/POS/ E-COM/M-COM/ Remittance/Product based transaction and financial institution in a single system.
- **N-Way Reconciliation** with inputs from ATM/MMS/HOST(CBS) /Switch/Remittance/Internet Banking and any third party payment system.
- **Cash Tallying** process for ATM/BDM/Re-cycler with Switch and CBS GL balance.
- **Network Clearing** (DMS) process for VISA/MasterCard/China Union Pay and Independent Product.
- **Computation of Fee/Surcharge** for issuer and acquirer transaction received from interchanges and posting surcharge transaction to core banking.
- Faster & Easy Investigation for **disputed transaction**.
- Dynamic Reporting tool.
- Automatic & Rule based reconciliation.

## BUSINESS BENEFITS

- **Highly Scalable** : The system is highly scalable - Manages & processes huge volume of transactions for Reconciliation & Settlement.
- **Highly Flexible** : The system is designed as highly flexible software with the possibility of future up-gradations.
- **Highly Parameterized** : The system is highly parameterized, which helps banks to adopt changes as per the requirements of bank.
- **Growth & Development** : As the reconciliation and dispute will be managed efficiently by application. Bank can increase their reach by installing more no. of ATMs, POS and by appointing various business correspondents.
- **Customer Satisfaction** : As the reconciliation is an automated process, bank will be able to check the transaction which is having issues. Based on the result, bank can pro-actively credit or debit the customer account for unsuccessful transaction without waiting for the customer to lodge the complaint .
- **Better Accounting** : As the complete reconcile result will be available at very next day, bank need not to maintain suspense account for retail banking transaction loss and can also manage the chargeback effectively.
